# MW500

## The VSD wherever you need

The MW500 is a high performance product dedicated for induction motor control, with embedded features and a high protection degree of IP66 / NEMA 4X which allow decentralized installation directly on the motor or on a wall. Designed exclusively for industrial or professional use, the decentralized WEG VSD adds a great deal of flexibility, allowing the user to install the product near to the controlled motor, thus eliminating the necessity of long cables and panels.

### Decentralized

Indoor or outdoor applications

### Flexible

Wide range of accessories and functions

### Robust

IP66/NEMA 4X outdoor enclosure

### Efficient

High performance for machines and processes

### Reliable

Same trustworthiness of WEG products

### Integrated

Communication networks

### Characteristics

Motor or wall assembly

Plug-in modules

Easiness to setup

SoftPLC

Increasing the ruggedness and durability

Functions to streamline operation and performance

WEG quality

Connectivity

## Advantages

It is possible for the MW500 to be assembled on a wall or, using the terminal box coupling directly over the W22 or W21 motors.

The optional communication network and I/O modules are fast and easily to be installed, allowing adaptation of the standard VSD to each application.

Within seconds, it is possible to download the SoftPLC program and parameters setup from a MW500 to others without powering them up, using the Flash Memory Module.

Built-in PLC (SoftPLC), allowing the VSD, motor and application to work in an interactive way. It allows the user to implement customized logic and applications.

Complete protection against contact with internal live parts, avoiding the entrance of dust or water coming from jets.

PID: process control.  
Sleep: disables the VSD automatically.

Flying start: allows to start a motor that was running freely, accelerating it from the speed at which it was running.

Ride through: keeps the VSD in operation during voltage dips.

100% of the VSDs are tested with load at the factory under rated conditions.

Protection against ground fault, short circuit, over temperature and others.

Thermal protection of IGBTs based on manufacturer curve.

Conformal Coating (Tropicalization) as standard. Classified as 3C2 according to IEC 60721-3-3.

CANopen, DeviceNet, Profibus-DP, Modbus-RTU, EtherNet-IP, Modbus-TCP, PROFINET-IO and possibility of Bluetooth communication.

## Benefits

Makes the commissioning easy, saving space and cabling, in other words, reducing cost for all installation.

Time saving, standardization and optimized costs according to the necessity.

Fast, easy and reliable programming for manufacturers that produce machines in large scale.

It eliminates the necessity of an external PLC, reducing costs, optimizing space and simplifying the system.

Panel not required, reducing the installation costs.

Energy saving.

It allows fast operating response of the machine and prevents occasional mechanical breakdowns.

It prevents machine stoppage and downtime.

High reliability.

It prevents damage to the inverter which can be caused by adverse situations, normally external factors.

VSD lifetime is extended: protection against chemically active substances, related to contamination from the atmosphere.

Full integration with process network.

## Easy Configuration

### Main Components

### Certifications

Note: check for availability.

- 1 - Motor connection
- 2 - Motor PTC input
- 3 - S10 dip-switches
- 4 - Simplified label
- 5 - Plug-in slot
- 6 - Power supply connection

- 7 - Grounding points
- 8 - Braking resistor connection
- 9 - LED indicators
- 10 - Connection box screw
- 11 - Grounding connection screw

## Applications

Centrifugal pumps

Process pumps

Mixers / bottlers

Conveyor belts

Compressors

Fans / exhaust fans

Washers / dryers

General machinery

## Special Features

**Conector IP66/NEMA 4X**  
Special conector for Remote HMI (M8) or external sensor

**Analog Potentiometer Built-In**  
No need HMI to operate

**Fins Instead of Fans**  
Reducing maintenance cost and audible noise

**LED Indicators**  
Programmable status indication

### Remote HMI

Simple and intuitive

**Switch-Disconnecter Built-In (Optional)**  
Easy and safe machine maintenance

## Characteristics

### Conformal Coating

Increasing the lifetime, protecting the electronic boards against corrosive atmospheres. Classified as 3C2 according to IEC 60721-3-3.

### RFI Filter

With C2/C3 options, the VSD faces a reduction in the EMC level, some cases even more, taking advantage of the motor and VSD distance, thus increasing the EMC class.

### IP66/NEMA 4X Protection Degree

Key to the decentralized solution, the IP66 provides protection against contact with internal live parts and the ingress of dust or water.

### Black Color

The black color increases the enclosure dissipation capability, helping the drive support up to 50 °C on motor mounting without derating.

### SoftPLC

Functions to streamline operation and increase performance, in many cases eliminating the necessity of an external PLC, optimizing and simplifying the system.

### SuperDrive G2 and WPS

Free softwares with possibility to communicate via Bluetooth with PCs or Smartphones (Android and IOS), allowing the parameter setting, command and monitoring of VSD, in this last option, simulating an oscilloscope with Trend function.

# MORE savings!

Space saving and  
flexible solution

Increased  
ruggedness

Cost savings  
on cables

Reduced installation  
costs

Easy  
commissioning

Panel not  
required

space

costs

Up to  
**40%**  
of cost  
reduction

## SuperDrive G2

Software application to program, control and monitor WEG VSDs. To connect MW500 to a computer it is necessary to use a plug-in module.

### Changing and Monitoring Parameters in a List/Table

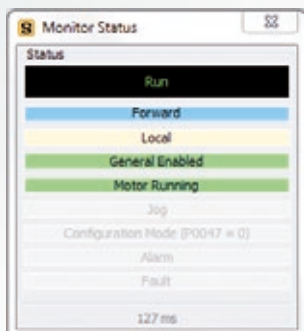

Parameter settings can be stored in a computer file format.

Monitor Parameters: Address 1						
Number	Function	Minimum	Maximum	Factory Setting	User Setting	Unit
0	Access to Parameters	0	9999	0	0

1,085 ms

- Upload/download parameters from the PC to the MW500 and vice versa
- Offline editing of the parameters stored on the PC

### Status Monitoring

### Operation with HMI

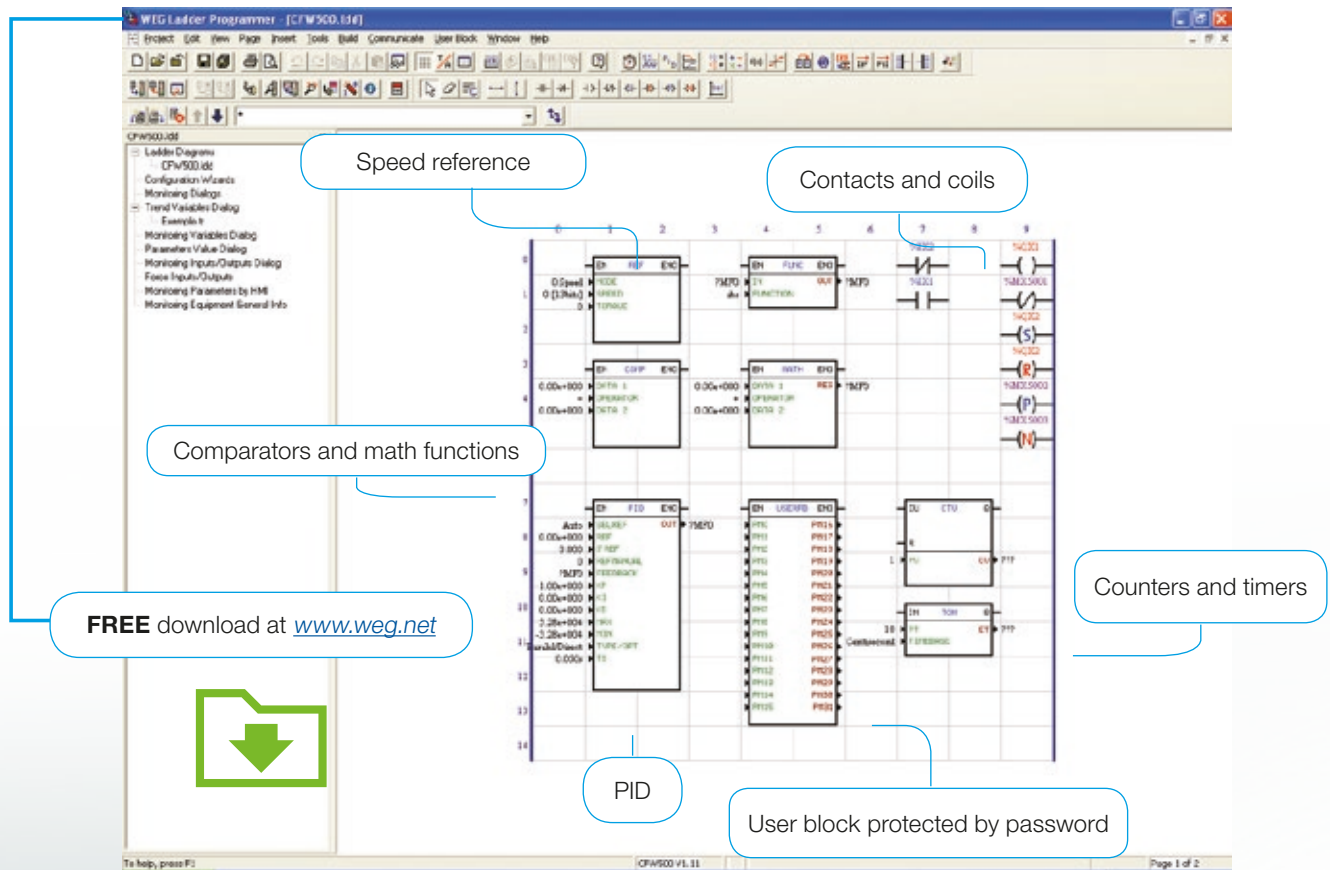

Online parameter editing.

## SoftPLC - Built-In in the Standard Product

Functionalities of a PLC available as standard, allowing the creation of applications. The WLP software and the SoftPLC functionality are a smart and simple way to make your MW500, motor and application work together. Plug-in module required to connect with a computer.

### Trace Function

- Online graphic monitoring of parameters/variables
- Configurable up to six channels

Easy programming: Ladder

## SoftPLC - Built-In in the Standard Product

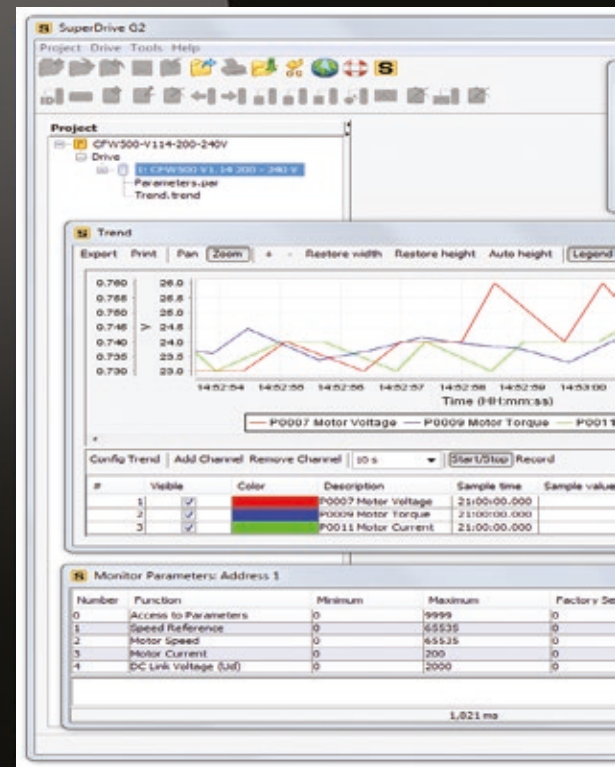

### Trend Function

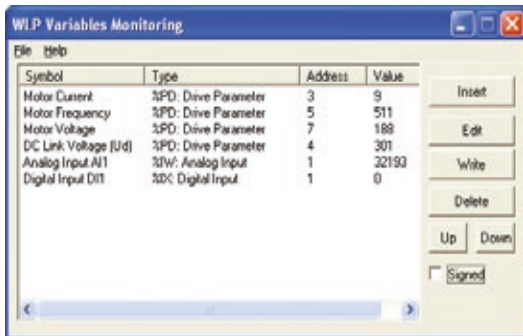

- Online graphic monitoring of parameters/variables
- Possibility to export an image with the respective graph based upon the selected period

Friendly environment

USB plug-in module available as accessory

## Online Monitoring Parameters/Variables List

## Parameter Edition

For changing the parameters values.

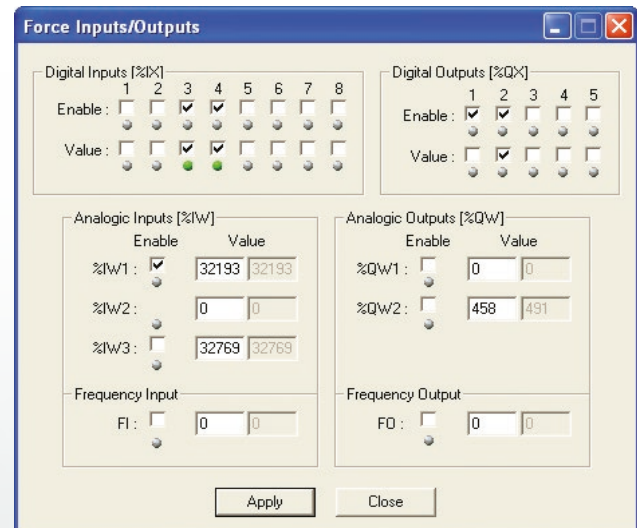

## I/Os Monitoring

## Enable/Disable I/Os

It simplifies and speeds up the validation of the application.

**FREE** download at [www.weg.net](http://www.weg.net)

## Coding

The MW500 code identifies its construction characteristics, nominal current, voltage range and optionals. Using the smart code, it is possible to select the MW500 required for your application simple and quickly.

Product and series	Model identification				Braking IGBT	Degree of protection	Conducted emission level <sup>1)</sup>	Disconnect switch	Connection box <sup>2)</sup>	Hardware version	Software version
	Frame size	Rated current	N° of phases	Rated voltage							
MW500	A	02P6	T	4	DB	66	C2	DS	A56	H00	---
MW500	Check table below				DB = with dynamic braking	66 = IP66/NEMA 4X	C2 = according to category 2 of IEC 61800-3 standard, with internal RFI filter	DS	A56	H00	
	DB = with dynamic braking										
	66 = IP66/NEMA 4X										
	Blank = with no RFI filter C2 = according to category 2 of IEC 61800-3 standard, with internal RFI filter										
	Blank = without disconnect switch DS = with disconnect switch										
	A56 = motor connection box size 56x56 mm; applies to frames A and B A70 = motor connection box size 70x70 mm; applies to frames A and B Blank = motor connection box sizes 70x70 mm and 110x110 mm; applies to frame size C										
	H00 = without plug-in module										
	Blank = standard Sx = special software										

Frame sizes	Output current	Input	Power supply voltage
A	04P3 = 4.3 A	S = single phase power supply	2 = 200... 240 V
	06P0 = 6.0 A		
A	02P6 = 2.6 A	T = three-phase power supply	4 = 380... 480 V
	04P3 = 4.3 A		
B	06P5 = 6.5 A		
	10P0 = 10 A		
C	14P0 = 14 A		
	16P0 = 16 A		

Notes: 1) RFI filter.

Categories:

- Category C1: inverters with voltages below 1,000 V, for use in the First Environment.

- Category C2: inverters with voltages below 1,000 V, with plugs or mobile installation, when used in the "First Environment", must be installed and started-up by a qualified professional.

- Category C3: inverters with voltages below 1,000 V, developed for use in the Second Environment and not designed for use in the "First Environment".

Environments:

- First Environment: environments that include household installations, such as buildings directly connected, without intermediate transformer, to a low-voltage power supply grid, which supplies buildings used for domestic purposes.

- Second Environment: includes all the buildings other than those directly connected to a low-voltage power supply grid, which supplies buildings used for domestic purposes.

For the RFI filters of external installations, refer to the MW500 user manual.

2) For frame size C, connections to box with 70 and 110 mm are possible, therefore no dedicated order option code for 70 or 110 mm is needed.

# Drive Ratings

Notes: 1) The power values for maximum applicable motor shown in the table above are reference values and valid for WEG motors. IEC motor powers are based on WEG motor four-pole W22 High Efficiency IE2, three-phase induction motors with power supply of 220 V, 230 V, 415 V or 460 V. UL motor power are based on WEG motor four-pole W22 Premium.

The proper sizing must be always determined according to the rated current of the motor, which must be lower than or equal to the inverter rated output current. For further information, please refer to the User's Manual.

2) The reference "XXX" in the smart code must be filled with A56 or A70, matching the MW500 connection box with the motor terminal box. For further details, check the tables "Motor and Drive Mechanical Combination" to select the code accordingly to the specified motor.

## Accessories and Optionals

The MW500 VSD was developed to meet the hardware configurations required by a wide range of applications. The table below presents the available options:

Option	Type	Description	Optional item code	Accessory model	Available
RFI filter	Optional	Used to reduce the disturbance conducted from the CFW500 to the power supply, in the high frequency band (>150 kHz), according to standards 61800-3 and EN 55011	C2	-	Factory installation only
Disconnect switch	Optional	A disconnect switch built-in the product for easy and safe maintenance	DS	-	Factory installation only
Wall mounting kit	Accessory	An adaptation plate for assemble the drive on the wall. For more information please check the user manual	-	MW500 - KCFA MW500 - KCFB MW500 - KCFC	User installation
Motor mounting kit	Accessory	An adaptation box for assemble the drive on the motor. For more information please check the user manual	-	MW500 - KAIM - A56 MW500 - KAIM - A70 MW500 - KAIM - B56 MW500 - KAIM - B70	User installation
I/O expansion modules (plug-in)	Accessory	Used to configure the I/O points according to the needs of the application/machine	-	CFW500-IOS CFW500-IOD CFW500-IOAD CFW500-IOR	-
Communication module (plug-in)	Accessory	Used for the communication of the MW500 with the main networks of the market (fieldbus)	-	CFW500-CUSB (USB) CFW500-CCAN (CANopen /DeviceNet) CFW500-CRS485 CFW500-CPDP2 (Profibus-DP) CFW500-CEMB-TCP (Modbus-TCP) CFW500-CEPN-IO (PROFINET-IO) CFW500-CETH-IP (EtherNet/IP)	-
Flash memory module (plug-in)	Accessory	Used to download the programming of a MW500 to others without having to power them up	-	CFW500-MMF	-
Remote HMI	Accessory	Used to transfer the operation to the panel door or machine console. Maximum distance of 10 m. Degree of protection IP54	-	CFW500-HMIR	-
Cables for remote HMI	Accessory	Communication wire for connection of IP20 keypad via XC10 connector	-	MW500-CCHMIRO.5M CFW500-CCHMIRXXM, where XX is the cable length of with lengths (X) of 1, 2, 3, 5, 7.5 and 10 meters	-

### Plug-In Modules

Plug-in module	Inputs		Outputs			USB port	Communication networks		V dc source	
	Digital	Analog	Analog	Relay	Transistor		Modbus-RTU RS485	Others	10 V	24 V
CFW500-IOS	4	1	1	1	1	-	1	-	1	1
CFW500-IOD	8	1	1	1	4	-	1	-	1	1
CFW500-IOAD	6	3	2	1	3	-	1	-	1	1
CFW500-IOR	5	1	1	4	1	-	1	-	1	1
CFW500-CUSB	4	1	1	1	1	1	1	-	1	1
CFW500-CCAN	2	1	1	1	1	-	1	CANopen/DeviceNet	1	1
CFW500-CRS232	2	1	1	1	1	-	1	RS232	-	1
CFW500-CRS485 <sup>1)</sup>	4	2	1	2	1	-	2	-	1	1
CFW500-CPDP	2	1	1	1	1	-	1	Profibus-DP	-	1
CFW500-CEMB-TCP	2	1	1	1	1	-	1	Modbus-TCP	-	1
CFW500-CEPN-IO	2	1	1	1	1	-	1	PROFINET-IO	-	1
CFW500-CETH-IP	2	1	1	1	1	-	1	EtherNet/IP	-	1

Note: 1) All plug-in models have at least one RS485 port. The CFW500-CRS485 plug-in module has two RS485 ports.

The CFW500 allows the installation of one plug-in module per unit.

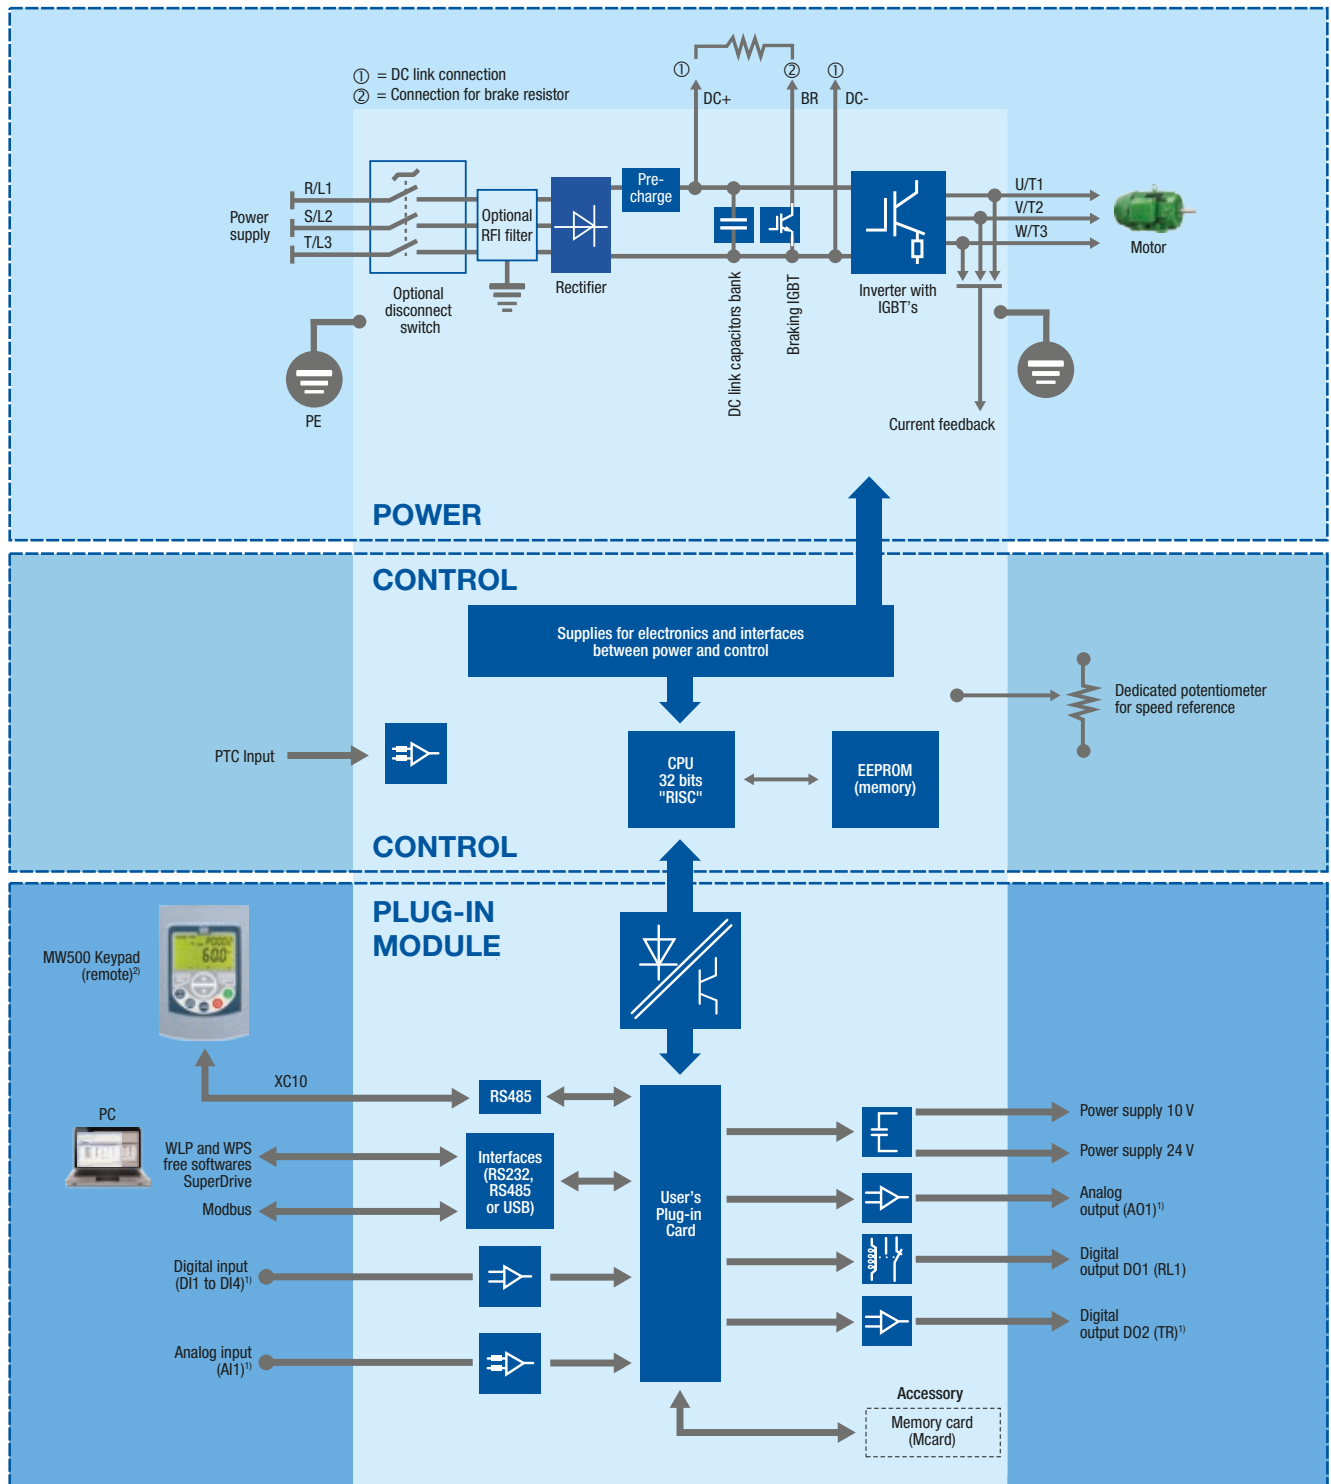

The plug-in modules are the same as those used on the CFW500.

For the other installation accessories of the MW500, refer to the product catalog or the user's manual.

### Step by Step

## Block Diagram

Notes: 1) The number of analog/digital inputs/outputs, as well as other resources, may vary according to the plug-in module used.  
For further information, refer to the specific plug-in module guide, available at [www.weg.net](http://www.weg.net).  
2) Not provided with the product.

## Technical Data

Power supply	Voltage and power range	1-phase, 200-240 V ac (+10%-15%) 1.1 and 1.5 kW (1.5 and 2.0 HP)
		3-phase, 380-480 V ac (+10%-15%) 1.1 to 7.5 kW (1.5 to 10 HP)
	Supply frequency	50/60 Hz (48 Hz to 62 Hz)
Motor connection	Voltage	3-phase, 0-100% of supplied voltage
	Output frequency	0 to 500 Hz
	Displacement power factor	>0.97
	Overload capacity	1.5 x In (drive) for 1 minute, every 10 minutes
	Switching frequency	Default 5 kHz (selectable 2.5 to 15 kHz)
	Acceleration time	0.1 to 999s
	Deceleration time	0.1 to 999s
Environment	Temperature	40 °C - for wall mounting installation
		50 °C - for motor mounting installation using self-ventilation at nominal speed
		2% of current derating for each °C above the specific operating temperature, limited to an increase of 10 °C
	Humidity	5% to 95% non-condensing
	Altitude	Up to 1,000 m - rated conditions
		1,000 m to 4,000 m - 1% of current derating for each 100 m above 1,000 m of altitude
		From 2,000 to 4,000 m maximum voltage reduction (380-480 V models) of 1.1 % for each 100 m above 2,000 m altitude.
Performance	V/f control	Speed regulation: 1% of the rated speed (with slip compensation)
		Speed variation range: 1:20
	Vector control (VW)	Speed regulation: 1% of the rated speed
		Speed variation range: 1:30
Braking methods	Dynamic braking	Available as standard for frame sizes A, B and C. An external resistor must be used for dynamic braking capability.
Safety	Protection	Overcurrent/phase-phase short circuit in the output
		Overcurrent/phase-ground short circuit in the output
		Under/overvoltage
		Overtemperature in the heatsink
		Overload in the motor
		Overload in the power module (IGBTs)
		External alarm / fault
		Setting error
Conectivity	Fieldbus	Profibus-DP, CANopen, DeviceNet, EtherNet/IP, Modbus-TCP, PROFINET-IO, USB, RS485, RS232 and Bluetooth

## Standards

Safety standards	UL 508C	Power conversion equipment.
	UL 840	Insulation coordination including clearances and creepage distances for electrical equipment.
	EN 61800-5-1	Safety requirements electrical, thermal and energy.
	EN 50178	Electronic equipment for use in power installations.
	EN 60204-1	Safety of machinery. Electrical equipment of machines. Part 1: General requirements. <i>Note: For the machine to comply with this standard, the manufacturer of the machine is responsible for installing an emergency stop device and equipment to disconnect the input power supply.</i>
	EN 60146 (IEC 146)	Semiconductor converters.
	EN 61800-2	Adjustable speed electrical power drive systems - Part 2: General requirements - Rating specifications for low voltage adjustable frequency AC power drive systems.
Electromagnetic Compatibility (EMC) Standards	EN 61800-3	Adjustable speed electrical power drive systems - Part 3: EMC product standard including specific test methods.
	EN 55011	Limits and methods of measurement of radio disturbance characteristics of industrial, scientific and medical (ISM) radio-frequency equipment.
	CISPR 11	Industrial, scientific and medical (ISM) radio-frequency equipment - Electromagnetic disturbance characteristics - Limits and methods of measurement.
	EN 61000-4-2	Electromagnetic compatibility (EMC) - Part 4: Testing and measurement techniques - Section 2: Electrostatic discharge immunity test.
	EN 61000-4-3	Electromagnetic compatibility (EMC) - Part 4: Testing and measurement techniques - Section 3: Radiated, radio-frequency, electromagnetic field immunity test.
	EN 61000-4-4	Electromagnetic compatibility (EMC) - Part 4: Testing and measurement techniques - Section 4: Electrical fast transient/burst immunity test.
	EN 61000-4-5	Electromagnetic compatibility (EMC) - Part 4: Testing and measurement techniques - Section 5: Surge immunity test.
	EN 61000-4-6	Electromagnetic compatibility (EMC) - Part 4: Testing and measurement techniques - Section 6: Immunity to conducted disturbances, induced by radio-frequency fields.
Mechanical construction standards	EN 60529	Degrees of protection provided by enclosures (IP code).
	UL 50	Enclosures for electrical equipment.

# Global presence is essential, as much as understanding your needs.

## Global Presence

With more than 30.000 employees worldwide, WEG is one of the largest electric motors, electronic equipments and systems manufacturers. We are constantly expanding our portfolio of products and services with expertise and market knowledge. We create integrated and customized solutions ranging from innovative products to complete after-sales service.

WEG's know-how guarantees our **MW500 - Decentralized VSD - MotorDrive** is the right choice for your application and business, assuring safety, efficiency and reliability.

**Availability** is to have a global support network

**Partnership** is to create solutions that suit your needs

**Competitive edge** is to unite technology and innovation

# Know More

High performance and reliable products to improve your production process.

Excellence is to provide a whole solution in industrial automation that improves our customers productivity.

Visit: [www.weg.net](http://www.weg.net)

[youtube.com/wegvideos](https://youtube.com/wegvideos)
